AccessTile Surface Applied Tile  
Wayfinding Bars  
From: \$25.06 Per sqft

## Detail

Access Tiles Surface Applied Directional Wayfinding Tiles (Directional Bar Tiles) are specifically designed to work in unison with truncated attention dome tiles. These Canadian accessibility code compliant wayfinding bars are designed to lead the public between spaces and follow the desired path safely. These (TWSI) tactile walking surface indicators use a series of bar shaped tactile surfaces creating a detectable path. These paths are created with truncated attention dome tiles to indicate where the path begins, ends or splits so the visually impaired can orient themselves to follow their desired path. Access Tile detectable directional warning pad is cost effective, light weight and extremely durable used with truncated attention dome tiles to create fully accessible pathways around any pace and to alert pedestrians of a paths end. Access Tile Direction Wayfinding bars are offered in Replaceable Cast in Place tiles and Surface Applied Tiles.

## Product Features

- A cost effective method of retrofitting an existing curb ramp application
- A complete system is shipped with the tiles; adhesive & colour match fasteners
- Beveled edges make for a smooth transition that meets Canadian Accessibility Codes
- Light weight and easy to handle
- Easily cut to conform to various sizes and radius ramps
