## Steel Cast-In-Place

From: \$116.70 Per sqft

Advantage One Stainless Steel Bars and Domes tactile walking surface indicators are designed for all interior accessibility solutions. The advantage One plate indicators are machined from a solid piece of 316L Marine Grade stainless steel and fastened to a Stainless-Steel plate that will be applied to the floor, offered as either attention domes or wayfinding bars. The Advantage One plate incorporates a texture into the stainless steel for permanent slip resistance while enhancing the aesthetics of the tile.
