From: \$8.25 Per Linear Foot

Non Photoluminescent Cast In Place Stair Nosings

[MORE INFORMATION](#)

## Detail

Ecoglo Non-Slip Photoluminescent Step Edge Contrast Strip provide step edge visibility in all lighting conditions even for several hours after the lights have gone out. The Photoluminescent Surface Applied Anti Slip Contrast Strips are made from hard wearing silicon carbon non-slip material bonded to aluminum plate allowing for long lasting all weather slip resistance and step edge visibility. The Photoluminescent Contrast strip colour contrasting and advanced photoluminscent material are ideal for stairs required by code to have luminous path markings. The Ecoglo Photoluminescent non-slip contrast slip is designed for installation onto flat steps and corridors with a pathmarking glow charged from overhead or natural lighting providing leading technology for guidance systems in all lighting conditions.

The photoluminescent strip provides luminance on the step edge in event of a black out. The International Building Code requires photoluminescent path marking in all high rises. Our step edge products with Photoluminescent strips exceed the standards for performance in ULC572S, which requires that Photoluminescent path marking operate for a minimum of 120 minutes of black out.

## Product Features

- High Visibility in Dark or Light Conditions
- High Durability for Indoor and Outdoor Applications
- Hard Wearing, Abrasion Resistant in all weather conditions
- Easy to Clean
- Environmentally Friendly No Radioactivity or Toxicity
- Flammable Resistant - Do not Burn
